

2020-2021

Dear Doctor,

At the present time, use of Nebulizers in our school environment is discouraged due to the distribution of aerosolized particles.

We ask that you consider prescribing an MDI with spacer (spacer must accompany) as a first line treatment. Asthma treatments will be preferably administered in our isolation rooms. If a nebulizer must be ordered in addition to an MDI, it will be used in emergent situations only.

Thank you,

Kearny Public Schools Nursing Department
